

ODF 1U, Air Blown Fiber – NCD 520 0013

Optical Distribution Frame

This unit is intended for termination of air blown fiber units (EPFU) in micro-ducts as well as traditional cables.

Features

- 1U for 19" standard width
- Small depth 280 mm
- Up to 48 fibers (using 24 x SC duplex cut out slots)
- Front serviced
- Supports SC, MT-RJ, E2000 and LC adapters
- Up to 48 Micro-ducts (ABF)

Application

The unit is typically used in FTTH networks for sites close to the Central Office or where any distributed 19" rack system is used or as a standard 1U field installed ODF.

Design

The incoming ducts enter the unit from behind. The unit is suitable for incremental blowing to or from the ODF since it is fully serviced from the front. The fibers coming in to the unit can be either spliced to pigtails within the ODF or if blown with pre-connected EPFU from the ODF spliced elsewhere.

All the necessary holders for splice protection sleeves, strain relief holders, etc is included. Splice sleeves, adapters and pig tails / fan outs are selected optional to suit the current need.

Horizontal patch guides or storage units to be mounted underneath the ODF is available as optional accessories.

The termination unit comprises a chassis, a drawer with front panel, duct holders, and a cover. The mounting brackets fit both 19"-standard mount and metric (ETSI) mounting holes.

The inside connectors are easily reached for maintenance from both upper and lower sides after opening the drawer. All done in a modular way for front serviced time saving installations and maintenance.

The optical performance of the ODF connections used in the Hexatronic systems is ensuring the right quality and stability over time.

ODF 1U, Air Blown Fiber – NCD 520 0013

Specifications

Entrances

The multi-ducts or cable enter the termination unit from the left side. Several multi-ducts of various sizes can enter the 90 x 38 mm sized inlet. The internal duct holders are designed for 5mm micro-ducts.

Material

The termination unit is made of painted Aluzinc sheet steel. All products are in accordance with RoHS.

Size, weight and color

Weight 4.4 kg
Dimensions excl. brackets
(HxWxD) 44 x 450 x 280 mm
Color Coral white

Ordering Information

Basic versions:. Adaptors are not included. “Blind plugs” are available to cover empty adapter slots in case of adaptation to lower numbers of connections.

PRODUCT NUMBER	TYPE	NO. OF SLOTS IN THE FRONT	MAXIMUM NO. OF FIBER CONNECTIONS
NCD 520 0013	SC-Duplex	24	48

1 LC-duplex fits in panel with SC cut out, LC-quadruplex and MTRJ-duplex fits in panel with SC-duplex cut out
